- Standby power consumption: <0.3 W

Product highlights

Ambisound
Ambisound technology produces truly embracing multi-channel surround sound from fewer speakers. It delivers an immersive 5.1 sound experience without the constraints of sitting position, room shape or size, and without the clutter of multiple speakers and cables. Through the combined effect of psychoacoustic phenomena, array processing and precisely angled driver positioning, Ambisound delivers more sound from fewer speakers.

SoundBar
The SoundBar is a complete all-in-one home theatre solution that delivers superb 5.1 surround sound for an immersive movie experience. With integrated speakers, amplifiers and DVD player, the SoundBar is all you need below your television. It lets you keep your living room the way you want it, yet delivers an amazing multi-channel sound experience - for movie moments shared with friends and family.

Dock your iPod
The docking station included with your home theatre system lets you play movies, music and photos from your iPod. What's more, you can control the iPod and browse through its contents on your TV screen - all with the home theatre system's remote. The dock brings portable entertainment into your home - with absolute convenience and ease of use.

Faroudja DCDi
Enjoy incredibly sharp, high-quality video on your progressive scan TV with Faroudja DCDi. The feature alleviates jagged edges that appear when standard interlaced video is viewed, especially with moving images - thus delivering natural-looking action scenes. Take your viewing experience to the next level with clearer, smoother pictures.

Hi-Speed USB 2.0 Link
The Universal Serial Bus or USB is a protocol standard that is conveniently used to link PCs, peripherals and consumer electronic equipment. Hi-Speed USB devices have a data transfer rate of up to 480 Mbps - up from the 12 Mbps of original USB devices. With Hi-Speed USB 2.0 Link, all you have to do is plug in your USB device, select the movie, music or photo and play away.

EasyLink
EasyLink lets you control multiple devices with one remote. It uses HDMI CEC industry-standard protocol to share functionality between devices through the HDMI cable. With one touch of a button, you can operate all your connected HDMI CEC-enabled equipment simultaneously. Functions like standby and play can now be carried out with absolute ease.
